Esta lista se confecciono en base a datos proporcionados por observadores independientes, de organizaciones no gubernamentales, y observaciones propias.

Las citas corresponden tanto a especies que se observan habitualmente, como a especies raras o encontradas una unica vez.

Los numeros entre parentesis corresponden al orden de la "Guia para la Identificacion de las Aves de Argentina y Uruguay" (Narosky - Yzurieta ; 1987). Se siguio el orden de esta guia por ser la de uso mas difundido entre los observadores de aves.

En lineas generales los nombres vulgares corresponden a los de la "Lista Patron de los Nombres Comunes de las Aves Argentinas" (Navas - Narosky - Bo - Chebez ; 1991). La nomenclatura cientifica se basa en la "Checklist of the Birds of South America" (Altman - Swift ; 1989).
